Learning Style: Virtual Classroom

Technology: Microsoft

Difficulty: Intermediate

Course Duration: 1 Day

## Implementing a Lakehouse with Microsoft Fabric (DP-601)

### About this Course:

This course is designed to build your foundational skills in data engineering on Microsoft Fabric, focusing on the Lakehouse concept. This course will explore the powerful capabilities of Apache Spark for distributed data processing and the

essential techniques for efficient data management, versioning, and reliability by working with Delta Lake tables. This course will also explore data ingestion and orchestration using Dataflows Gen2 and Data Factory pipelines. This course includes a combination of lectures and hands-on exercises that will prepare you to work with lakehouses in Microsoft Fabric.

## **Audience:**

The primary audience for this course is data professionals who are familiar with data modeling, extraction, and analytics. It is designed for professionals who are interested in gaining knowledge about Lakehouse architecture, the Microsoft Fabric platform, and how to enable end-to-end analytics using these technologies.

## **Course Objectives:**

- Describe end-to-end analytics in Microsoft Fabric
- Describe end-to-end analytics in Microsoft Fabric
- Create a lakehouse
- Ingest data into files and tables in a lakehouse
- Query lakehouse tables with SQL
- Configure Spark in a Microsoft Fabric workspace.
- Identify suitable scenarios for Spark notebooks and Spark jobs.
- Use Spark dataframes to analyze and transform data.
- Use Spark SQL to query data in tables and views.
- Visualize data in a Spark notebook.
- Understand Delta Lake and delta tables in Microsoft Fabric
- Create and manage delta tables using Spark
- Use Spark to query and transform data in delta tables
- Use delta tables with Spark structured streaming
- Describe pipeline capabilities in Microsoft Fabric
- Use the Copy Data activity in a pipeline
- Create pipelines based on predefined templates
- Run and monitor pipelines

## **Prerequisites:**

**You should be familiar with basic data concepts and terminology.**

## **Course Outline:**

### **Module 1:** Introduction to end-to-end analytics using Microsoft Fabric

Discover how Microsoft Fabric can meet your enterprise's analytics needs in one platform. Learn about Microsoft Fabric, how it works, and identify how you can use it for your analytics needs

## **Learning Objectives:**

- Describe end-to-end analytics in Microsoft Fabric

## **Lessons:**

- Explore end-to-end analytics with Microsoft Fabric
- Data teams and Microsoft Fabric
- Enable and use Microsoft Fabric

## **Module 2: Get Started with lakehouses in Microsoft Fabric**

Lakehouses merge data lake storage flexibility with data warehouse analytics. Microsoft Fabric offers a lakehouse solution for comprehensive analytics on a single SaaS platform.

## **Learning Objectives:**

- Describe core features and capabilities of lakehouses in Microsoft Fabric
- Create a lakehouse
- Ingest data into files and tables in a lakehouse
- Query lakehouse tables with SQL

## **Lessons:**

- Explore the Microsoft Fabric Lakehouse
- Work with Microsoft Fabric Lakehouses
- Exercise - Create and ingest data with a Microsoft Fabric Lakehouse

## **Module 3: Use Apache Spark in Microsoft Fabric**

Apache Spark is a core technology for large-scale data analytics. Microsoft Fabric provides support for Spark clusters, enabling you to analyze and process data in a Lakehouse at scale.

## **Learning Objectives:**

- Configure Spark in a Microsoft Fabric workspace.
- Identify suitable scenarios for Spark notebooks and Spark jobs.
- Use Spark dataframes to analyze and transform data.
- Use Spark SQL to query data in tables and views.
- Visualize data in a Spark notebook.

## **Lessons:**

- Prepare to use Apache Spark
- Run Spark code
- Work with data in a Spark dataframe
- Work with data using Spark SQL
- Visualize data in a Spark notebook

## **Module 4: Work with Delta Lake tables in Microsoft Fabric**

Tables in a Microsoft Fabric lakehouse are based on the Delta Lake storage format commonly used in Apache Spark. By using the enhanced capabilities of delta tables, you can create advanced analytics solutions.

### **Learning objectives:**

- Understand Delta Lake and delta tables in Microsoft Fabric
- Create and manage delta tables using Spark
- Use Spark to query and transform data in delta tables
- Use delta tables with Spark structured streaming

### **Lessons:**

- Understand Delta Lake
- Create delta tables
- Work with delta tables in Spark
- Use delta tables with streaming data

## **Module 5: Ingest Data with Dataflows Gen2 in Microsoft Fabric**

Data ingestion is crucial in analytics. Microsoft Fabric's Data Factory offers Dataflows (Gen2) for visually creating multi-step data ingestion and transformation using Power Query Online.

### **Learning objectives:**

- Describe Dataflow (Gen2) capabilities in Microsoft Fabric
- Create Dataflow (Gen2) solutions to ingest and transform data
- Include a Dataflow (Gen2) in a pipeline

### **Lessons:**

- Understand Dataflows (Gen2) in Microsoft Fabric
- Explore Dataflows (Gen2) in Microsoft Fabric
- Integrate Dataflows (Gen2) and Pipelines in Microsoft Fabric

## **Module 6: Use Data Factory pipelines in Microsoft Fabric**

Microsoft Fabric includes Data Factory capabilities, including the ability to create pipelines that orchestrate data ingestion and transformation tasks.

### **Learning objectives: ?**

- Describe pipeline capabilities in Microsoft Fabric
- Use the Copy Data activity in a pipeline
- Create pipelines based on predefined templates
- Run and monitor pipelines

### Lessons:

- Understand pipelines
- Use the Copy Data activity
- Use pipeline templates
- Run and monitor pipelines

### Credly Badge:

#### **Display your Completion Badge And Get The Recognition You Deserve.**

Add a completion and readiness badge to your LinkedIn profile, Facebook page, or Twitter account to validate your professional and technical expertise. With badges issued and validated by Credly, you can:

- Let anyone verify your completion and achievement by clicking on the badge
- Display your hard work and validate your expertise
- Display each badge's details about specific skills you developed.

Badges are issued by QuickStart and verified through Credly.
