

Migrate and Modernize SAP in the Microsoft Cloud (AZ-1006)

Modality: Virtual Classroom

Duration: 1 Day

About This Course:

This 1-day course teaches IT professionals who have experience with SAP solutions how to use Azure resources that include setting up and configuration of SAP environments in Azure for virtual machines, virtual networks, storage accounts, and Microsoft Entra ID. Learners will also explore backup, disaster recovery, and monitoring of SAP systems in Azure. Learn through the application of concepts, scenarios, and procedures through hands-on labs using Azure Center for SAP solutions

Course Objectives:

- Understand the benefits of running SAP on Azure.
- Learn the various SAP solutions supported by Azure.
- Discover methods for migrating existing SAP environments to Azure.
- Explore tools and services that facilitate the migration and modernization process.
- Gain knowledge on how to optimize SAP workloads for Azure to achieve performance and efficiency.
- Familiarize with best practices for security, backup, and disaster recovery for SAP on Azure.
- Learn how to manage and monitor SAP applications in the Azure cloud.

Audience:

Administrators of SAP systems that run on Azure should take this course. Before taking this course, candidates should pass the Azure Administrator (AZ-104) or Azure Infrastructure Solutions (AZ-305) exam and have completed training in SAP HANA or SAP NetWeaver.

Prerequisites:

- Understanding of SAP workloads and architecture
- Experience with Microsoft Azure services
- Knowledge of SAP migration and modernization strategies
- Familiarity with basic migration tools and methodologies
- SAP Basis or equivalent IT experience

Course Outline:

- Understand the benefits of running SAP on Azure.
- Learn the various SAP solutions supported by Azure.
- Discover methods for migrating existing SAP environments to Azure.

- Explore tools and services that facilitate the migration and modernization process.
- Gain knowledge on how to optimize SAP workloads for Azure to achieve performance and efficiency.
- Familiarize with best practices for security, backup, and disaster recovery for SAP on Azure.
- Learn how to manage and monitor SAP applications in the Azure cloud.
