Learning Style: Virtual Classroom

Technology: Microsoft

Difficulty: Intermediate

Course Duration: 1 Day

Migrate and Modernize SAP in the Microsoft Cloud (AZ-1006)

About This Course:

This 1-day course teaches IT professionals who have experience with SAP solutions how to use Azure resources that include setting up and configuration of SAP environments in Azure for virtual machines, virtual networks, storage accounts,

and Microsoft Entra ID. Learners will also explore backup, disaster recovery, and monitoring of SAP systems in Azure. Learn through the application of concepts, scenarios, and procedures through hands-on labs using Azure Center for SAP solutions

Course Objectives:

- Understand the benefits of running SAP on Azure.
- Learn the various SAP solutions supported by Azure.
- Discover methods for migrating existing SAP environments to Azure.
- Explore tools and services that facilitate the migration and modernization process.
- Gain knowledge on how to optimize SAP workloads for Azure to achieve performance and efficiency.
- Familiarize with best practices for security, backup, and disaster recovery for SAP on Azure.
- Learn how to manage and monitor SAP applications in the Azure cloud.

Audience:

Administrators of SAP systems that run on Azure should take this course. Before taking this course, candidates should pass the Azure Administrator (AZ-104) or Azure Infrastructure Solutions (AZ-305) exam and have completed training in SAP HANA or SAP NetWeaver.

Prerequisites:

- Understanding of SAP workloads and architecture
- Experience with Microsoft Azure services
- Knowledge of SAP migration and modernization strategies
- Familiarity with basic migration tools and methodologies
- SAP Basis or equivalent IT experience

Course Outline:

- Understand the benefits of running SAP on Azure.
- Learn the various SAP solutions supported by Azure.
- Discover methods for migrating existing SAP environments to Azure.
- Explore tools and services that facilitate the migration and modernization process.
- Gain knowledge on how to optimize SAP workloads for Azure to achieve performance and efficiency.
- Familiarize with best practices for security, backup, and disaster recovery for SAP on Azure.

- Learn how to manage and monitor SAP applications in the Azure cloud.

Credly Badge:

Display your Completion Badge And Get The Recognition You Deserve.

Add a completion and readiness badge to your LinkedIn profile, Facebook page, or Twitter account to validate your professional and technical expertise. With badges issued and validated by Credly, you can:

- Let anyone verify your completion and achievement by clicking on the badge
- Display your hard work and validate your expertise
- Display each badge's details about specific skills you developed.

Badges are issued by QuickStart and verified through Credly.
