ITIL Specialist: Create, Deliver, and Support

“If you enroll in this course without the Master Subscription plan, you receive a Free Official Exam Voucher for The ITIL Specialist: Create, Deliver, and Support Exam”

About This Course:

This three-day hands-on program leads to a ITIL Specialist Certificate in ITIL Create, Deliver, and Support. This program is for IT professionals working within, or about to enter, an IT environment requiring a detailed understanding of value stream design, practice creation and alignment, and cross-functional collaboration model

Course Objectives:

- Plan and build value streams
- Use ITIL practices to support the creation of new services
- Use ITIL practices to provide effective user support
- Coordinate, Prioritize, and Structure Work Activities
- Assess Build vs Buy Considerations
- Assess Sourcing Alternatives
- Service Integration and Management (SIAM)

Audience:

All IT staff and Management responsible for the creation of new services, service transition planning, ongoing service delivery, and user support would benefit from this course.

- Service Desk personnel and Management
- Technical Support personnel and Management
- Data Center Operations personnel and Management
- Security Operations personnel and Management
- Application Support Personnel and Management
- Project and Program Managers looking to better integrate Operational Readiness

Prerequisites:

All students need to have completed and passed the ITIL 4 Foundation examination prior to attending this course.

Course Outline:

- Plan and build value streams
- Align organizational structure
