Microsoft® Access® for Office 365 : Part 2

About This Course:

Your training and experience using Microsoft® Access® has given you basic database management skills, such as creating tables, designing forms and reports, and building queries. In this course, you will expand your knowledge of relational

database design; promote quality input from users; improve database efficiency and promote data integrity; and implement advanced features in tables, queries, forms, and reports. Extending your knowledge of Access will result in a robust, functional database for your users.

Course Objectives:

- Provide input validation features to promote the entry of quality data into a database.

- Organize a database for efficiency and performance, and to maintain data integrity.

- Improve the usability of Access tables.

- Create advanced queries to join and summarize data.

- Use advanced formatting and controls to improve form presentation.

- Use advanced formatting and calculated fields to improve reports.

Audience:

- Intermediate to advanced users familiar with Microsoft Access basics who want to deepen their skills and create more robust, user-friendly databases.

Prerequisites:

- To ensure your success in this course, it is recommended you have completed Microsoft® Access® for Office 365™: Part 1 or possess equivalent knowledge.
