Microsoft® Word for Office 365™ : Part 3

About This Course:

Being able to manipulate graphics and efficiently create, manage, revise, and distribute long documents and forms can help your organization create important and interesting documents. Implementing time-saving features that enable you to

work well in a collaborative mode will benefit both you and your organization. Constructing document elements that ensure your readers have access to pertinent information at the click of a button, while at the same time protecting sensitive information, is another important skill. Mastering these skills and techniques will make you a valued employee in your organization.

Course Objectives:

- Use images in a document.
- Create custom graphic elements.
- Collaborate on documents.
- Add reference marks and notes.
- Secure a document.
- Create and manipulate forms.
- Create macros to automate task

Audience:

- This course is intended for students who want to use more advanced functionalities in Microsoft Word, including image manipulation, collaboration and revision tracking, cross-referencing and linking, document security, forms, and process automation through macros.

Prerequisites:

- To ensure your success, you should have basic user skills for any current version of Windows®, including being able to start programs, switch between programs, locate saved files, close programs, and access websites using a web browser. In addition, you should be able to navigate and perform common tasks in Word, such as opening, viewing, editing, and saving documents; formatting text and paragraphs; formatting the overall appearance of a page; and creating lists and table

Course Outline:
