EC-Council Certified Responsible AI Governance & Ethics (CRAGE)

About This Course:

The Certified Responsible AI Governance & Ethics (CRAGE) certification from EC-Council equips professionals with the knowledge and frameworks needed to govern, manage, and oversee AI initiatives responsibly. Aligned with leading

standards such as NIST AI RMF and ISO/IEC 42001, the course covers AI governance, ethics, risk management, regulatory compliance, privacy, auditing, and accountability across the AI lifecycle. Through practical governance scenarios and framework-driven learning, participants gain the skills to build trustworthy, compliant, and scalable AI programs within their organizations.

What's Included:

- One-year access to the E-courseware
- Exam Voucher valid for one year
- One-year access to self-paced training videos

Course Objectives:

- Understand the core principles of Responsible AI, ethics, and trustworthy AI systems
- Apply major AI governance frameworks such as NIST AI RMF and ISO/IEC 42001
- Evaluate and manage AI-related risks across the AI lifecycle
- Implement AI compliance strategies aligned with global regulations (e.g., EU AI Act concepts)
- Establish policies for AI transparency, accountability, and fairness
- Assess and mitigate bias, privacy, and security risks in AI systems
- Develop organizational structures for AI governance and oversight
- Perform AI audits and assurance activities to ensure responsible deployment
- Manage third-party and vendor AI risk exposure
- Support business decision-making for ethical and compliant AI adoption

Audience:

- Program Managers
- Project Managers
- Digital Transformation Leaders

- IT Managers
- AI Strategy Leaders

Prerequisites:

- Basic understanding of IT systems and how software applications are used in organizations
- Familiarity with general cybersecurity, data privacy, or risk management concepts (recommended but not mandatory)

Course Outline:

- AI Governance Frameworks
- Responsible AI Principles and Ethics
- NIST AI RMF
- ISO/IEC 42001
- EU AI Act Compliance
- AI Risk Management
- AI Auditing and Assurance
- Privacy, Trust, and Safety in AI
- Third-Party AI Risk Management
- AI Incident Response and Business Continuity
