

SharePoint 2013 Power User: SCA

Modality: Self-Paced Learning

Duration: 2 Hours

SATV Value:

CLC:

NATU:

SUBSCRIPTION: Learn, Master

About this course:

In this course, we learn about SharePoint. Companies use SharePoint to make sites. You can utilize it as a protected spot to store, share, organize, and access data from any device. You just need an internet browser, for example, Internet Explorer, Microsoft Edge, Firefox, or Chrome. This course provides the total site proprietor story from beginning to end in a practical and engaging approach to make sure you have the confidence to create and plan new sites or your existing site management. You will probably figure out how to make SharePoint applicable to your group by utilizing a site's usefulness to assist you with sharing data and work together with your colleagues.

The normal compensation for an Administrator of SharePoint is \$70,767 every year.

Course Objective:

After finalizing this course, learners will be able to:

- Create and Configure Libraries
- Plan Site Creation
- Create and Edit Content Pages
- Manage Content in SharePoint
- Create Sites and Subsites
- Create and Configuring Lists
