The Complete Web Developer Course 2.0

Modality: On Demand

Duration: 30 Hours

About this Course:

This comprehensive 30 Hours Training Program covers every key concept of building career-boosting and professional websites. Instructed by Rob Percival, this course is a complete website development walkthrough for both entry-level web developers and professionals striving to attain fluency in web application developments. Professionals will gain proficiency in both back-end and front-end web development processes and techniques. This course strives to help professionals pursue a successful career as a Web Developer earning $78,542 annually.

Through this course, professionals will learn the art of developing websites on both Private Network (Intranet) and World Wide Web (Internet). This course helps professionals understand both the basic and advance concepts of web development such as single static web page development and complex web application development. Furthermore, professionals will also learn the basics of integrating social networks and electronic business services. The primary objective of this course is to help Programming Enthusiasts & Web Developers build familiarity with the art of developing websites highly-available and responsive websites.

Course Objectives:

The core objective of this course is to help professionals develop a better understanding and sound knowledge of the following key concepts:
