

# **Advanced Technologies of SharePoint 2016 - MOC On Demand (MS-20339-2)**

**Modality:** On Demand

**Duration:** 2 Days

**SATV Value:** 2

*This course is for professionals planning to enroll in the 70-339 Exam leading to the 70-339 Certification. The official exam voucher is not included in this course. However, the official exam voucher can be purchased separately on request.*

## **About this Course:**

*This course is only accessible for 90 days from the enrollment date and is a Microsoft On-Demand Course. Candidates having annual subscriptions or candidates who purchase this course individually will lose access to this course after 90 days.*

This course provides a comprehensive overview of Advanced Microsoft SharePoint 2016 Technologies and is designed to help professionals succeed in the 70-339 Certification Exam. This course helps professionals get the practical knowledge of working in the Microsoft SharePoint 2016 Environment and designing & implementing Advanced Technologies. On average, a professional SharePoint Developer earns \$95,249 annually.

## **Course Objectives:**

The core objective of this course is to help professionals develop a sound knowledge and understanding of the following key concepts:

- Microsoft SharePoint 2016 Core & Hybrid Features and Functionalities
- Microsoft SharePoint 2016 Architecture and Work Management Configuration
- Business Connectivity Services Management and Configuration
- Designing Business Environment focusing on Disaster Recovery & Availability
- Microsoft SharePoint 2016 Migration and Upgrades
- Social Computing Features & Business Intelligence Solutions Configuration
- Enterprise Content Management Planning and Configuration in SharePoint 2016
- Microsoft SharePoint 2016 Solutions Management and Application Configuration

## **Audience:**

- IT Professionals and Experts
- Experienced Microsoft SharePoint Administrators
- Data Center Operators
- Professionals striving to clear the 70-339 Certification Exam

## **Prerequisites:**

Professionals planning to enroll in the Advanced Technologies of SharePoint 2016 – MOC On-Demand (MS-20339-2) Course must comply with the following prerequisites:

- Minimum 1 Year Experience in Business Requirements Mapping
- Practical Experience in Managing Windows Server 2012 and Windows 2008 R2 Server
- Familiarity with Claim-Based Security Implementation
- Conceptual Know-how of Windows PowerShell 2.0 Application Management
- Experience in Administering Internet Information Services and Microsoft SQL Server
- Knows Active Directory Configuration and Network Design & Security
- Familiar with Application Deployment in On-Premises and Cloud Systems

## **Course Outline:**

### **Module 1: Introduction to SharePoint 2016**

This module describes the core architectural components of a SharePoint Server environment, and also helps to identify the new depreciated and removed features in SharePoint 2016.

#### **Lessons**

- Core components of the SharePoint 2016 architecture
- New, deprecated, and removed features in SharePoint 2016
- SharePoint 2016 and SharePoint Online editions

#### **Lab : Reviewing the core Microsoft SharePoint 2016 concepts**

- Configuring SharePoint 2016 farms
- Creating and configuring site collections and sites
- Provisioning service applications by using the SharePoint 2016 Management Shell

After completing this module, students will be able to:

- Describe the architectural features of a Microsoft-SharePoint 2016.
- Identify the new, deprecated, and removed features in SharePoint 2016.
- Describe the editions for SharePoint 2016 on-premises and Microsoft SharePoint Online.

### **Module 2: Introduction to hybrid scenarios for SharePoint 2016**

This module describes the key hybrid features in SharePoint 2016, and helps you to prepare for a hybrid SharePoint 2016 deployment.

#### **Lessons**

- Exploring the hybrid features in SharePoint 2016
- Preparing for a hybrid SharePoint 2016 deployment

#### **Lab : Configuring an Office 365 tenant**

- Creating an Office 365 tenant

## **Lab : Creating hybrid team sites**

- Preparing the SharePoint environment
- Running the SharePoint Hybrid picker

After completing this module, students will be able to:

- Describe the key hybrid features in SharePoint Server 2016.
- Prepare for a hybrid SharePoint 2016 deployment.

## **Module 3: Designing business continuity management strategies**

This module explains how to select an appropriate database server configuration to meet availability requirements. It also describes how to design a physical architecture and infrastructure to meet high-availability requirements. Finally, this module explains how to develop and implement a backup and restore strategy.

### **Lessons**

- Designing database topologies for high availability and disaster recovery
- Designing a SharePoint infrastructure for high availability
- Planning for disaster recovery

## **Lab : Planning and performing backup and restore**

- Create a backup and restore plan
- Test the backup and restore process

After completing this module, students will be able to:

- Select an appropriate database server configuration to meet availability requirements.
- Design a physical architecture and infrastructure to meet high-availability requirements.
- Develop and implement a backup and restore strategy.

## **Module 4: Planning and implementing Business Connectivity Services and Secure Store Service**

This module explains how to configure Business Connectivity Services (BCS), and describes how to configure and manage the Secure Store Service application. It also explains how you can configure and manage BCS models.

### **Lessons**

- Planning and configuring BCS
- Configuring the Secure Store Service
- Managing BCS models

## **Lab : Configuring BCS and the Secure Store Service**

- Configuring the BDC Service Application
- Configuring the Secure Store Service

## **Lab : Managing BDC models**

- Configuring a Secure Store Service target application
- Importing and configuring BDC models

After completing this module, students will be able to:

- Plan and Configure Business Connectivity service application.
- Plan and configure the Secure Store Service application.
- Manage the Business Data Connectivity models.

## **Module 5: Configuring productivity services for a SharePoint 2016 deployment**

This module describes SharePoint Add-in architecture. This module also explains how to provision and manage SharePoint apps and App Catalogs. Additionally, this module describes how to provision Microsoft Access Services, Visio Services, Word Automation Services, PowerPoint Automation Services, and SharePoint Translation Services.

### **Lessons**

- Understanding the SharePoint Add-in architecture
- Provisioning and managing apps and App Catalogs
- Provisioning productivity services

## **Lab : Configuring and managing SharePoint Add-ins**

- Configuring a SharePoint farm to support apps
- Creating and configuring a corporate App Catalog
- Deploying and monitoring apps

After completing this module, students will be able to:

- Describe Microsoft SharePoint Add-ins and the supporting SharePoint infrastructure.
- Provision and configure SharePoint Add-ins and App Catalogs.
- Manage how apps are used within a SharePoint 2016 deployment.

## **Module 6: Managing solutions in Microsoft SharePoint 2016**

This module describes the purpose and structure of SharePoint 2016 features and solutions. In addition, it explains how to manage sandbox solutions in Microsoft SharePoint 2016.

### **Lessons**

- Understanding the SharePoint 2016 solution architecture
- Managing sandboxed solutions

## **Lab : Managing solutions**

- Configuring a SharePoint farm to support sandboxed solutions
- Configuring a SharePoint site to support sandboxed solutions
- Deploying farm solutions

After completing this module, students will be able to:

- Manage features and solutions in Microsoft SharePoint 2016..
- Manage sandboxed solutions in a SharePoint 2016 deployment.

## **Module 7: Connecting people**

This module explains how to manage user profiles and how to plan and configure My Site and social features. This module also describes how to configure community sites.

### **Lessons**

- Managing user profiles
- Enabling social interaction
- Building communities

## **Lab : Configuring profile synchronization and My Sites**

- Configuring profile synchronization
- Configuring My Sites

## **Lab : Configuring community sites**

- Creating a community site infrastructure
- Configuring Community Site participation

After completing this module, students will be able to:

- Manage user profiles in Microsoft SharePoint 2016 and configure user profile synchronization by using Microsoft Identity Manager (MIM) 2016.
- Enable social interaction in SharePoint 2016.
- Build communities and community sites in SharePoint 2016.

## **Module 8: Planning and configuring web content management**

This module explains how to plan and configure a web content management infrastructure to meet business requirements. This module also describes how to configure managed navigation and product catalog sites, and how to configure support for multilingual sites. Additionally, it explains and how to plan and manage design and customization for publishing sites, and how to plan and

configure support for mobile users.

## Lessons

- Planning and implementing a web content management infrastructure
- Configuring managed navigation and catalog sites
- Supporting multiple languages and locales
- Enabling design and customization
- Supporting mobile users

### Lab : Configuring managed navigation and catalog sites

- Configuring a product catalog site
- Configuring Cross-Site Publishing
- Configuring publishing sites

### Lab : Configuring device channels

- Configuring device channels

After completing this module, students will be able to:

- Plan and configure a web content management infrastructure.
- Configure managed navigation and product catalog sites.
- Plan and Configure support for multilingual sites and locales.
- Manage design and customization for publishing sites.
- Plan and configure support for mobile users.

## Module 9: Planning and configuring Enterprise Content Management

This module explains how to plan for management of content and documents, and how to plan for and configure eDiscovery. Additionally, it describes how to plan for records management and compliance.

## Lessons

- Planning Enterprise Content Management
- Planning and configuring eDiscovery
- Planning records management

### Lab : Configuring eDiscovery in SharePoint 2016

- Creating and configuring an eDiscovery Center
- Discovering and preserving content
- Querying and exporting content

### Lab : Configuring records management in SharePoint Server 2016

- Configuring in-place records management

After completing this module, students will be able to:

- Plan how to manage content and documents.
- Plan and configure eDiscovery.
- Plan records management and compliance.

## **Module 10: Planning and configuring business intelligence solutions**

This module explains how to plan business intelligence (BI) architecture for SharePoint 2016, and how to deploy and manage BI services. Additionally, this module explains how to plan and configure advanced analysis tools.

### **Lessons**

- Planning BI architecture
- Planning, deploying, and managing BI services
- Planning and configuring advanced analysis tools

### **Lab : Installing Office Online Server**

- Deploy Office Online Server

### **Lab : Configuring PowerPivot and Power View for SharePoint 2016**

- Configuring PowerPivot for SharePoint 2016
- Configuring Power View for SharePoint

After completing this module, students will be able to:

- Explain the Microsoft SharePoint business intelligence (BI) architecture, its components, and plan for business intelligence.
- Plan, deploy, and manage the core Microsoft SharePoint 2016 BI services.
- Configure the advanced BI options available in SharePoint 2016 and Microsoft SQL Server 2014.

## **Module 11: Planning and configuring productivity and collaboration**

This module explains how to plan and configure productivity and collaboration features. This module also explains how to plan and configure composite solutions in SharePoint 2016.

### **Lessons**

- Planning and configuring collaboration features
- Planning and configuring composites

### **Lab : Configuring and working with project sites**

- Creating an Office Online Server farm and configuring integration in SharePoint 2016
- Creating project sites
- Configuring project sites
- Engaging project teams
- Configuring Project Server integration

### **Lab : Configuring a workflow**

- Configuring Microsoft Azure Workflow and Microsoft SharePoint Workflow Services
- Creating and testing a workflow

After completing this module, students will be able to:

- Describe how to plan and configure SharePoint collaborative and coauthoring options.
- Configure project sites and engage teams.
- Plan and configure composites.
- Configure workflows in SharePoint 2016.

## **Module 12: Upgrading and migrating to SharePoint 2016**

This module explains how to prepare for upgrade or migration to SharePoint 2016. In addition, it explains how to manage site collections are how to upgrade them to SharePoint 2016. Finally, the module describes how to upgrade advanced content from SharePoint Server 2013 to SharePoint 2016.

### **Lessons**

- Preparing for an upgrade or migration
- Upgrade to SharePoint 2016
- Planning and managing a site-collection upgrade

### **Lab : Performing a content database migration and upgrade from Microsoft SharePoint Server 2013**

- Migrating SharePoint Server 2013 Managed Metadata Service
- Upgrading a SharePoint Server 2013 content database

### **Lab : Managing site-collection upgrades**

- Preparing site collections for upgrade
- Upgrading site collections

After completing this module, students will be able to:

- Plan and prepare for an upgrade.
- Perform upgrades to data and service applications.
- Upgrade site collections.
- Upgrade advanced content from SharePoint Server 2013 to SharePoint 2016.
