Difficulty: Intermediate

Course Duration: 2 Hours

Introduction to Puppet Roles and Profiles

About the course:

This course is for anyone who wants to familiarize themselves with puppet and want to know about Roles and Profiles design pattern.

It entails an in depth explanation of the theory of Roles and Profiles backed with

practical scenarios.

We will go through a lot of things in this course mainly how generic settings of your infrastructure can be managed by creating a base profile and how different platforms in the base profile can be handled by covering a design pattern. Other than that Hieradata will be used alongside Profiles and class parameters and employ create_resources in order to handle resources via the data gathered by Hiera.

Targeted Audience:

Anyone looking to employ Roles and Profiles in Puppet Infrastructure

Prerequisite:

Knowledge of Puppet Infrastructure.

Course Outline:

- Introduction to this course
- Role and Profile Theory
- Setting up roles and profiles
- Making it Rock with Hiera
- profile::base with multiple platforms
- Setting up a role and profile for a webserver
- Node Classification with Roles and Profiles
- Course Conclusion

Credly Badge:

Display your Completion Badge And Get The Recognition You Deserve.

Add a completion and readiness badge to your LinkedIn profile, Facebook page, or Twitter account to validate your professional and technical expertise. With badges issued and validated by Credly, you can:

- Let anyone verify your completion and achievement by clicking on the badge
- Display your hard work and validate your expertise
- Display each badge's details about specific skills you developed.

Badges are issued by QuickStart and verified through

Credly.
