

Create a Chat Application with PHP and Ajax

Modality: On Demand

Duration: 1 Hour

In this course you will learn to build your own, fully functional chat application for websites using PHP and Ajax.

Target Audience

This chat application is actually relatively straight forward and easy to create. Anyone with a basic knowledge of the languages listed above (and even if you are new to them) should find that they are able to follow along and create this simple chat application with ease.

Pre-requisites

A basic knowledge of PHP and Ajax is recommended for this course, but both beginners and experienced web developers will benefit from this concise set of tutorials. We will also be using some basic JavaScript, MySQL and jQuery.

Course Outline:

- Introduction to the Course
- Create Your Own Chat Application with PHP and Ajax
- Finalizing Our Chat Application
