70-662: Deploying Microsoft Exchange Server 2010

Modality: On Demand

Duration: 15 Hours

"The exam associated with this training has been retired. However for purely educational purposes you can access this training."

About this course:

What is Microsoft Exchange Server? Well it is a mail server and calendaring server developed by Microsoft. It runs exclusively on Windows Server operating systems. In this certification course you will learn how to use active directory and support infrastructure, use active directory components, and the network-based services. The course also teaches you about the server roles in Exchange Server 2010, and infrastructure requirements for Exchange Server 2010. You will learn about mailbox servers and recipients, securing the server, mailbox database update process, public folder process for MAPI clients, and e-mail address policies. The course will focus the ways of managing client access, POP3 and IMAP4 options, and Outlook client connectivity troubleshooting. Finally, the course will teach you how to manage Message Transports, Exchange Security and how to implement High Availability. The actual purpose of this course is to prepare the students for [Microsoft 70-662: TS: Microsoft Exchange Server 2010, Configuring certification exam](#).

The average salary for a Microsoft Exchange Administrator is **$71,170** per year
