PHP Tutorial: PHP Login Script Creation

Modality: On Demand

Duration: 2 Hours

About the course:

Each online community or portal, for example, Online Community Forums, Discussion Boards, and Online Gaming expects users to make accounts and sign in. That is one thing in like manner that these portals or forums have.

This course shows you how to make the credentials for login or information exchange that are a piece of a user management framework. In two hours, you'll master all that you have to know to make a user sign-in, secure them and coordinate the client login framework into pretty much any kind of site.

Target Audience:

This course is for every designer dealing with a running platform on PHP.

Prerequisites:

Basic PHP

Course Outline:

- Section 1: Getting Started
- Section 2: Register
- Section 3: Login
