

HTML5 and CSS3 Fundamentals

Modality: On Demand

Duration: 5 Hours

About this course:

The one and only method for smart learning of HTML5 that will not only be easy but productive as well, is by designing websites right from the first step. In this course, you will be taught precisely in the same way. The course is intended for freshers in this field, and will teach the learners to design website section by section in the span of 35 lectures and 5 hours duration.

In terms of the digital world, it is challenging no doubt to gain an edge in the field. This can be seen by the fact that the world wide web came up with the latest installation i.e. HTML5. This is the newest version of web code. If you gain expertise in HTML5 and CSS3, you will be well on your way on the path of success. This course will teach you on the matter of building/designing like a pro with HTML5 & CSS3 Design. You will begin off with learning about the HTML tags and their way of using, after which you will learn about the use of attributes and common settings. The fun part comes after you know the foundations of the HTML: the CSS. CSS is used for fonts, colors, lists, navigation menus, making additions of a new element to the website with each section. Links, layouts, tables, forms and videos are also taught about. It is a great plus if you are good at using web browser and text editor, and you are good to go as well. There is no need for any type of extra software or tools. You have the choice of choosing your preferred option in each. Towards the end of all of it, you will be fully capable of creating any kind of functional, handy, and amazing website.

Requirements:

The only requirement for this course is that you should know how to use a browser and text editor. It is up to your free will whichever one option you would like to choose from each, as there are many free options available.
