

Fundamentals of Ajax jQuery and JSON

Modality: On Demand

Duration: 3 Hours

If you want to be a web developer, you need to know Ajax, jQuery and JSON. Learn what these technologies are, how they work together, and how to build real life applications using them.

This easy to follow course teaches beginning web developers what you need to know to begin using Ajax, jQuery and JSON in the real world. Our approach is to teach them all in one course so you can understand the entire process of developing with these technologies instead of learning one, then struggling to understand how it works with other technologies to produce something useful.

Course Outline:

Introduction to the Course

- Getting ed with jQuery and Ajax
- Introduction to JSON
- Exercise: Create Search Functionality for a Site
- Bonus: Create an Ajax Chat Application
