

70-680: Advanced Windows 7 Installation

Modality: On Demand

Duration: 30 Min

About this course:

The Advanced Windows 7 Installation is a shorter version of the 70-680: Installing and Configuring Windows 7.

Students who have a minimum of 1-year experience in the IT field will be able to grasp the concepts easily, as they would already be familiar with the implementation and administration of Windows Client OS.

This course shall also benefit those who use Windows 7 on an individual level at an organization. As this is a beginner level course you don't need any prior experience, also this course has no background limitations.

The major purpose of this course is to fully prepare the students for the certification of Microsoft 70-680: Windows 7.

A windows Systems Administrator on average earns \$68,978 annually.

Course Objective:

At the end of the course, students shall be able to:

- Install Windows 7 smoothly
- Update previous versions of Windows to Windows 7
- Shift user profiles from previous versions after the update

Audience:

This course is suitable for every individual who wants to learn about Windows 7 installation and configuration.

Prerequisites:

Students shall have some experience of working with windows 10 OS such as DVD.

Suggested prerequisites courses:

- [Windows 7: Basic](#)

Course Outline:

- Advanced Windows 7 Installation
