JavaScript - Beginner

Modality: On Demand

Duration: 3 Hours

About this course:

Alongside HTML and CSS, JavaScript is another core technology for website design. It is a dynamic and interpreted programming language which in turn helps make interactive web pages.

You'll learn how to tweak websites by enhancing the back end of HTML and CSS to allow for greater control, shortcuts and formatting. Once you've learned to design and build web pages, you can advance your skills with JavaScript.

The average salary for JavaScript Developer is **$96,000** per year.

Course Objective:

After completing this course, students will have a working understanding of:

- Variables
- Inside HTML
- Objects
- Alert
- document.write
- getElementById
