Microsoft Cloud Workshop: Azure Stack (MS-40522)

Modality: Virtual Classroom

Duration: 1 Day

SATV Value: 1

About this course:

The purpose of this course is to teach participants how to build a hybrid cloud architecture using a variety of the Azure Stack and Azure public cloud. This usable architecture will allow users to optimize their investments in Azure as a "cloud-platform," not as a "location" for Azure. On Azure Stack, participants can discover how to evaluate which systems are good for the Azure public cloud, and which are best suited.

Course Objective:

- Comprehending Azure Stack's taxonomy: regions, subscriptions, quotas, plans services, tenants, and packages.
- Explain how the Azure Stack or public Azure cloud is suitable based on user needs.
- Build and implement hybrid connectivity between Azure Stack and Azure public cloud.
- Define how Azure Stack and Azure Public Cloud Services integrates.
- Define the suppliers of resources available for use with Azure Stack

Audience:

This online training program is designed for IT professionals and Cloud Architects who have solutions design and infrastructure architecture experience in cloud technology and want to know more about Azure and its services as defined in the ' At Course Completion ' and ' About this Course ' areas. Anyone taking this training should also be trained in other cloud technologies other than MS, fulfill the preconditions of the program, and want to cross-train on Azure.

Course Outline:
