Microsoft Cloud Workshop: Azure security and management (MS-40518)

Modality: Virtual Classroom

Duration: 1 Day

SATV Value: 1

About this course:

Develop and configure the OMS, update an app with the Application Insights instruments, and integrate data from App Insights into the OMS.

Course Objective:

- Instrument an app with App logging insights
- Explore Operations Management Suite and Application Insights data
- Log Analysis is used to look for security issues

Audience:

This online training program is designed for IT professionals and Cloud Architects who have solutions design and infrastructure architecture experience in cloud technology and want to know more about Azure and its services as defined in the ' At Course Completion ' and ' About this Course ' areas. Anyone taking this training should also be trained in other cloud technologies other than MS, fulfill the preconditions of the program, and want to cross-train on Azure.
