Learning Style: On Demand

Technology: Microsoft

Difficulty: Beginner

Course Duration: 12 Hours

Microsoft Professional Orientation : Front-End Web Developer

About this course:

This online training program is intended to introduce learners to the Web Front-End Developer practice by presenting the different technologies that programmers use when constructing websites.

The technology focuses on elements of web development which are the aspect of the front-end of a web app, more precisely, the code that runs on the user computer instead of on the server.

This online training is the first program that applicants take as part of the Web Front-End Developer, MS Professional Program, This will incorporate concepts which will be part of the course work during the program. Learners will learn the basics of technology and have the opportunity to examine a few of the developer tools and code for working on web apps.

Course Objective:
