Agile Scrum Foundations Certification

About this Course:

This beginner-level certification program is designed for Software Developers, IT Professionals, Team Leaders, Business Managers, and Project Managers. This course provides a comprehensive overview of the EXIN Agile Scrum Foundation Core Concepts. Professionals get to learn about advanced agile methodologies and scrum practices and learn the art of working in an agile-based business enterprise. Professionals with expertise in scrum practices can successfully pursue a wide

range of roles and an Agile Scrum Professional earns $90,000 annually.

This course helps professionals establish and develop cross-functional and self-managed teams and understand the true concepts of deliverables. There is a wide range of uncertainties involved in a project and a certified Agile Scrum Practitioner can effectively manage these complexities within a business enterprise. The primary objective of this course is to train and prepare professionals for success in the EXIN Agile Scrum Master Certification and focuses on the key topics and concepts of the certification exam.

Course Objectives:

The core objective of this course is to help professionals gain a better knowledge and understanding of the following key concepts:

- Agile Scrum Essentials and Fundamentals
- Scrum Practices, Techniques, and Planning
- Understanding Advanced Concepts of Agile Scrum
