

Understanding the Modern Messaging Infrastructure (MS-200T01)

Modality: Virtual Classroom

Duration: 2 Days

SATV Value: 2

In the event that you join up with all the training of MS-200 series (200T03, 200T02, and 200T01) without the Master Subscription plan, you get a Free Voucher of Official Exam for the exam of MS-200. This course does exclude Exam Voucher whenever enlisted the Master Subscription, but, you can demand to buy the Official Exam Voucher independently.

About this course:

With this course, students will find out about the design of the latest messaging infrastructure with Exchange Online and Exchange Server and the method to deploy messaging in various situations and businesses. You will be taught with the procedure of initial deployment and acquainted with the tools of messaging management. You will figure out how to make and oversee various sorts of recipients, and how to make and oversee the databases of Exchange Server mailbox, which works in storage areas for all the data of messaging. At last, you will be acquainted with the organizational settings of messaging infrastructure, for example, how to configure quotas for users in the company, how to oversee authentication for your messaging environment, and how to design company sharing to the federation.

Salary Estimate:

The normal compensation for an Administrator of Enterprise Messaging Systems is **\$87,750** every year.

Course Objective:

At the time of finishing this course, understudies will have the option to:

- Comprehend the Architecture of Modern Messaging
- Manage and Create Exchange Recipients
- Manage and deploy an Architecture of Modern Messaging
- Design for Mailbox Databases
- Organize Organizational Settings
- Manage Messaging Authentication
- Manage and Create Mailbox Databases
- Manage Email Lists, Addresses, and Resources
- Organize Organizational Sharing

Targeted Audience:

The Administrator of Messaging manages, configures, deploys, and troubleshoots permissions,

recipients, mail flow, mail protection, and public folders in both cloud enterprise and on-premises environments. Responsibilities include messaging infrastructure, managing message hygiene, and hybrid migration and configuration. The Administrator of Messaging also manages and implements high availability, disaster recovery, and client access.

To execute a protected hybrid topology that addresses the issues of business of a modern association, the Messaging Administrator must work together with the Microsoft 365 Enterprise Administrator and Security Administrator. The Administrator of Messaging must have working information on authentication licensing, types, and integration with Microsoft 365 applications.

Prerequisite:

This course is intended for people who are seeking the job of Microsoft 365 Messaging Administrator.

Course Outline:

Module 1: Managing Modern Messaging InfrastructureLessons

- Overview of Modern Messaging Architecture
- Deploying Modern Messaging Infrastructure
- Managing Modern Messaging Infrastructure

Module 2: Managing Recipient Objects and ResourcesLessons

- Exchange Recipients
- Creating and Managing Exchange Recipients
- Managing Email Addresses, Lists, and Resources

Module 3: Mailbox Databases in Exchange ServerLessons

- Mailbox Databases in Exchange Server
- Planning for Mailbox Databases
- Creating and Managing Mailbox Databases
- Troubleshooting Mailbox Databases

Module 4: Managing Organizational SettingsLessons

- Managing Authentication for Messaging
- Configuring Organizational Settings
- Designing Solutions for External Access

Module 5: Course Conclusion

Lab : Managing Recipient Infrastructure

- Creating an On-premise Recipient
- Creating a Cloud Recipient

- Creating an On-premises Distribution Group
- Creating a Cloud Distribution Group
- Creating an Office 365 Group
