### **About this course:**

In this course, you will learn about the different messaging-related security and compliance service configurations and settings with Exchange Server and Exchange Online. You will begin by examining the fundamentals of message hygiene with Exchange Online Protection and Exchange Advanced Threat Protection, as well as connection and spam filtering with Exchange. You will then examine messaging compliance solutions, such as retention and data loss prevention policies, as well as audit log investigations and eDiscovery search mechanisms from the messaging compliance perspective. You will learn how to plan a proper deployment and how to perform the basic implementation process for each solution. You will conclude the course by examining how to manage permissions that are assigned to user and admin roles.

### **Course Objective:**

After completing this course, students will be able to:

- Plan for Message Hygiene
- Manage Anti-Malware and Anti-Spam Policies
- Manage Advanced Threat Protection
- Plan for Messaging Compliance in the SCC
- Plan for Messaging Compliance in Exchange

- Manage Exchange Online Archiving and Auditing
- Manage Content Search
- Manage Admin Role-based Permissions
- Manage User Role-based Permissions
- Plan for Exchange Setup - RBAC and AD Split Permission

## **Audience:**

The Messaging Administrator deploys, configures, manages, and troubleshoots recipients, permissions, mail protection, mail flow, and public folders in both on-premises and cloud enterprise environments. Responsibilities include managing message hygiene, messaging infrastructure, and hybrid configuration and migration. The Messaging Administrator also implements and manages disaster recovery, high availability, and client access. The Messaging Administrator collaborates with the Security Administrator and Microsoft 365 Enterprise Administrator to implement a secure hybrid topology that meets the business needs of a modern organization. The Messaging Administrator should have a working knowledge of authentication types, licensing, and integration with Microsoft 365 applications.
