Setting Up a Real : World Project in Jira

Modality: On Demand

Duration: 1 Hour

About this course:

We get familiar with a real-world way to deal with setting up a task in JIRA with this course. As the course title indicates, this isn't a model task, but instead, it's a real-world task that is utilized consistently. We'll begin by recovering the story for the task so we'll realize what the requirements are. At that point we'll begin constructing the task, modifying JIRA to satisfy our needs. Along the route, we'll find out about issues, projects, issue types, screens, plans, work processes, time following and considerably more.

The normal compensation of a Jira Administrator is $105,446 every year.

Course Objective:

- Explore how the features of JIRA can be utilized together in a real-world situation.
- Make your own project of JIRA all the way.

Audience:

A manager of JIRA who wants a practical way of setting up a project

Prerequisite:

- You'll require access to administration to JIRA.
- You'll need to have a general comprehension of how JIRA functions.
- Optionally, a fundamental comprehension of Photoshop for making the JIRA issue type avatar

Course Outline:

Introduction and project overview

- Introduction and project overview
