Difficulty: Beginner

Course Duration: 4 Hours

OWASP: Threats Fundamentals

About this course:

The Open Web Application Security Project (OWASP): Threats Fundamental course is among the learning courses under the OWASP series that was designed to enhance the security of the applications. With OWASP, a reliable way is offered for developing, operating, acquiring, maintaining, and deploying the applications. OWASP tools, documents, forums, and chapters are available to all free of charges to improve application security. Under this course, a candidate can get an outline of the fundamental concepts, which are vital to the OWASP core values.

The OWASP: Threats Fundamental course is designed to offer essential fundamental techniques and concepts, which are necessary to recognize different sorts of threats. The course additionally offers understanding and knowledge concerned to cryptography and data exposure together with ideas to improve security by elimination risk of misconfiguration.

Salary Estimate:

The professional after the completion of this course can expect to make \$89,000/-per annum.

Course Objective:

This course is intended to offer the following knowledge to the candidate;

- Knowledge in terms of preventing security misconfiguration threats.
- Knowledge of the top 10 threats in in regards of an application.
- Knowledge regarding the prevention of sensitive data from exposure.
- Knowledge of session and authentication threats as well as identification process.
- Use of functional level access control to improve security.

Audience:

The course is advantageous for the following;

- Application security engineers
- Software developers
- Network security engineers
- Ethical hackers

Prerequisite:

The candidate attempting this exam are required to have fundamental knowledge of web applications and network security. The course is also helpful for the developers

Course Outline:

Chapter 01 - Understanding Threats

- Topic A: OWASP Overview Part 1
- OWASP Overview Part 2
- OWASP Overview Part 3
- Topic B: Top Ten Threats Part 1
- Top Ten Threats Part 2
- Top Ten Threats Part 3
- Review Question

Chapter 02 - Session Security

- Topic A: Authentication and Session Threats Part 1
- Authentication and Session Threats Part 2
- Authentication and Session Threats Part 3
- Topic B: Threat Examples Part 1
- Threat Examples Part 2
- Threat Examples Part 3
- Review Question

Chapter 03 - Security Misconfiguration

- Topic A: Security Misconfiguration Part 1
- Security Misconfiguration Part 2
- Security Misconfiguration Part 3
- Topic B: Misconfiguration Examples Part 1
- Misconfiguration Examples Part 2
- Misconfiguration Examples Part 3
- Review Question

Chapter 04 - Data Exposure and Cryptography

- Topic A: Sensitive Data Exposure Part 1
- Sensitive Data Exposure Part 2
- Sensitive Data Exposure Part 3
- Topic B: Insecure Cryptographic Storage Part 1
- Insecure Cryptographic Storage Part 2
- Insecure Cryptographic Storage Part 3
- Topic C: Function Level Access Control Part 1
- Function Level Access Control Part 2
- Function Level Access Control Part 3
- Review Question
