What's New in SQL Server 2019 (Coming Soon)

Modality: On Demand

Duration: 2 Hours

About this course:

Data Scientists and IT professionals that work closely with SQL Server are eagerly waiting for Microsoft SQL Server 2019. The database tool offers unparalleled analytical capabilities as well as storage for both cloud and on-premises versions. Microsoft SQL Server 2019 will also play an important role in future advancements in machine learning, as it will facilitate data professionals in building machine learning models.

Course Objective:

- Get to know data virtualization via Big Data Clusters in SQL Server 2019
- Learn about the changes in Database Engine Enhancements in SQL Server 2019
- Gain knowledge on SQL on Linux in SQL Server 2019

Audience:

- People working with SQL Server 2016 and older versions
- People interested in MCSA: SQL Database Development, Database Administration, Business Intelligence and similar certifications

Prerequisite:

- Basic knowledge of Microsoft SQL Server

Course Outline:

- **Lesson 1 – Overview of SQL Server 2019**
- **Lesson 2 –Big data clusters**
- **Lesson 3 – Databases engine**
- **Lesson 4 – Security, Availability, Platform**
