

Role Of SVMs in Cluster Management

Modality: Self-Paced Learning

Duration: 1 Hour

SATV Value:

CLC:

NATU:

SUBSCRIPTION: Learn, Master

About this course:

This is a self-paced course which has the duration of 1 hour. This course teaches you on the role of SVMs in Cluster Management. The course has beginner level of training so there are no requirements. Cluster administrators oversee entire sets of clusters and alongside the Storage Virtual Machines (SVMs), or also called as Vservers, contained in those clusters. Such tasks require proper training before handling any of these matters in real-life. These cluster administrators are also capable of configuring SVMs and assign the task of overseeing the SVMs to the SVM administrators. The particular capacity of the cluster administrators depend on the range of access and control they have in their positions.

Audience:

The course is designed for IT professionals who want to implement these practices in their workforce.

Requirements:

No prior requirements.
