Practice Exam - 300-085: Implementing Cisco Collaboration Applications

About this Exam:

This intermediate-level 30 Minutes 300-085 Practice Exam is specifically designed for Channel Partners, Employees, Customers, and Network Engineers. This practice exam accredits the skills and knowledge of a Network Engineer working

with Cisco Unified Communication and Collaboration tools. The CCNP Collaboration Certification also validates the Cisco Collaboration System Designing skills of the professional and their proficiency in deploying, configuring, and troubleshooting Cisco Solutions.

The 300-085 is an integral certification exam for IT Professionals and Network Engineers and is the last of the four essential certifications needed to attain the CCNP Collaboration Certification. The other three include the 300-070, 300-075, and 300-080 Certification related to Cisco Implementation, Troubleshooting, and Application Integration. This is a perfect accreditation certification for professionals who are familiar with Unified Communication Network, Applications, and Appliances.

Course Objectives:

The core objective of this course is to help professionals train and prepare for the 300-085 Certification Exam. The 300-085 is the last of the four essential exams candidates need to clear to attain the CCNP Collaboration Certification.
