Practice Exam - 300-208: Implementing Cisco Secure Access Solutions (SISAS)

Modality: On Demand

Duration: 30 Min

About this Exam:

This intermediate-level 30 Minutes 300-208 Practice Exam is specifically designed for Channel Partners, Employees, Customers, and Network Security Engineers. This practice exam accredits the skills and knowledge of a Network Security Engineer in Router & Switches Security, Firewall Deployment, Management, and Troubleshooting, and Networking Devices Maintenance.

The 300-208 is an integral certification exam for IT Professionals and Network Engineers and is the second of the four essential certifications needed to attain the CCNP Security Certification. The other three include the 300-206. 300-209, and 300-210 Certification related to Cisco Edge Network Security Solution Implementation, Secure Mobility Solutions Implementation, and Threat Control Solutions Implementation.

The CCNP Security Certification is perfect for professionals who want to succeed in their professional careers and successfully land jobs in high-profile and large-scale Information Technology Firms & Organizations.
