Difficulty: Intermediate

Course Duration: 30 Min

Practice Exam - CISSP: Certified Information Systems Security Professional

About This Exam:

The examination is built for professional security experts, executives, and managers who are engaged in demonstrating their expertise along a wide range of security procedures and concepts.

Targeted Audience:

The targeted audience of this exam are:

- Security Analyst
- IT Director
- Security Consultant
- IT Manager
- Security Manager
- Network Architect
- Security Systems Engineer
- Director of Security
- Security Auditor
- Chief Information Security Officer
- Security Architect

Prerequisite:

- Applicants should have at least five years of combined full-time paid job experience in two or all of the eight CISSP CBK areas. A bachelor's or regional variant or an additional certificate from the (ISC)2 official list would fulfill one year of experience needed. Education credit can fulfill just one year of job experience.
- A candidate who does not have the necessary experience of becoming a CISSP can become an Associate of (ISC)2 by finishing a CISSP exam. The Associate of (ISC)2 will have six years to obtain the five years of experience.

Certfications:

CISSP certification.

Recommended Prerequisite Courses:

None
