NATU:

SUBSCRIPTION: Learn, Master

About this Exam

Candidates for this exam are professional developers who use Microsoft Visual Studio 2017 and ASP.NET to design and develop web solutions. Candidates should have a minimum of three to five years of experience developing Microsoft ASP.NET MVC–based solutions and knowledge of Microsoft Azure Web Apps.

Audience:

- This course is projected for expert web developers who utilize Microsoft Visual Studio in an individual-based or team-based, small-sized to big development setting. Applicants for this course are interested in understanding dot net web applications and developing innovative web applications and need to handle the reduced HTML carefully. They want to build websites that discrete the user interface, data entrance, and application logic.

Pre-requisites:

- At least two to three years of knowledge developing web-based applications by means of Microsoft Visual Studio and Microsoft ASP.NET, expertise in using the .NET Framework, and firm knowledge of the C# language.

Certifications:

This exam is 1 of 3 mandatory exams to earn MCSA: Web Applications certification. The other mandatory exam to earn this certification is 70-480 & 70-483
