

Practice Exam - 70-410: Installing and Configuring Windows Server 2012

Modality: Self-Paced Learning

Duration: 30 Min

SATV Value:

CLC:

NATU:

SUBSCRIPTION: Learn, Master

About this Exam:

This exam is part one of a series of three exams that test the skills and knowledge necessary to implement a core Windows Server 2012 infrastructure in an existing enterprise environment. Passing this exam validates a candidate's ability to implement and configure Windows Server 2012 core services, such as Active Directory and the networking services. Passing this exam along with the other two exams confirms that a candidate has the skills and knowledge necessary for implementing, managing, maintaining, and provisioning services and infrastructure in a Windows Server 2012 environment.

Audience:

- Windows Server administrators who are relatively new to Windows Server administration and related technologies who are looking to learn more about Windows Server 2012 and Windows Server 2012

Prerequisites:

- An understanding of networking fundamentals.
- An understanding of basic AD DS concepts.
- An awareness and understanding of security best practices.
- Basic knowledge of server hardware.
- Experience working with, and configuring, Windows client operating systems, such as Windows 7 or Windows 8.

Certifications:

This exam is 1 of 3 mandatory exams to earn MCSA Windows Server 2012 certification. The other mandatory exam to earn this certification is 70-411 & 70-412.
