Data Science Research Methods: Data Science Project

Modality: On Demand

Duration: 14 Days

You've come so far in your data science journey! Over the past few weeks you've covered some essential math for machine learning, data science research methods, and kept improving your R and Python programming skills. In the third project you're going to be applying some of those data science research method skills. You can choose to do this project in either R or Python.

Course Outline:
