Learning Style: On Demand

Technology: Microsoft

Difficulty: Beginner

Course Duration: 14 Days

Project 1: Exploratory Data Analysis

Over the past four weeks you've covered a lot of material! You're well on your way to becoming a data scientist. To recap the content so far, you have received a quick introduction to the data science workflow, including exploration, visualization, statistics, and machine learning Gotten hands-on experience with analyzing data in Excel. Learned about dashboards and reports in Power BI Discovered how to use key storytelling principles to generate high impact with data

This first project is one of five projects you will complete through the bootcamp. These projects both provide you with hands-on experience and can serve as the start of your data science portfolio!

Course Outline:
