The primary objective of this course is to prepare professionals seeking success in the Citrix Certified Expert in Virtualization (CCE-V) exam.

## **Course Objectives:**

The core objective of this course is to help professionals gain valuable knowledge and understanding of the following key elements:

- Pre-Existing Deployment Pertinent Information Evaluation of Citrix Virtual App and Desktop Ecosystem
- Identification of Risks and Areas needing Improvement in Citrix Environment
- Designing Citrix Virtual Apps and Developing Desktop Designs
- Taking Development Decision while maintaining perfect alignment with the business needs
- Developing a Practical Solution based on evaluation of existing Citrix Environment
- Developing Disaster Management and Recovery Plan for Citrix Virtual Desktop & Apps.
- Describing Numerous Disaster Recovery Considerations

## **Audience:**

- Experienced IT Professionals with practical knowledge of Citrix Desktops 7, Virtual Apps, and Infrastructure.
- Professionals liable for designing and maintaining Citrix Virtual App and Desktop ecosystem
- Professional IT Consultants

## **Prerequisites:**

Professionals planning to enroll in the Citrix Virtual Apps and Desktops 7 Assessment, Design, and Advanced Configuration (CWS-415) course requires to comply with the following prerequisites:

- Extensive experience of working with Citrix Gateway, Virtual Apps, and Desktops 7
- Conceptual understanding of the System Infrastructure

## **Course Outline:**

### **Module 1: Methodology & Assessment**

- Methodology
- Business Drivers
- User Segmentation
- Application Assessment
- Capabilities Assessment

### **Module 2: User Layer**

- Endpoints & Peripherals
- Citrix Workspace App
- Network Connectivity

### **Module 3: Access Layer**

- Access Matrix\*
- Access Layer Architecture Design Considerations
- StoreFront Store Design
- Scalability and Redundanc

### **Module 4: Resource Layer - Images**

- FlexCast Model Assignment\*
- Virtual Delivery Agent Machine Scalability
- Virtual Delivery Agent Machine Security
- Provisioning Strategy / Image Management

### **Module 5: Resource Layer - Applications and Personalization**

- Application Delivery
- Profiles
- Policies
- Printing\*

### **Module 6: Control Layer**

- Citrix Virtual Apps and Desktops Site Design
- Machine Catalogs & Delivery Groups\*
- Site Management Considerations
- Control Layer Scalability & High Availability
- Control Layer Security

## **Module 7: Hardware/Compute Layer**

- Assessment Considerations for Hardware & Hypervisor
- Selection
- Cluster / Resource Pool Design
- Hardware / Compute Layer Sizing
- Storage
- Datacenter Networking
- Security

## **Module 8: Maintaining an App Layering Environment**

- Multiple Location Considerations - Introduction
- Multiple Location Considerations - Access
- Multiple Location Considerations - Image Management
- Multiple Location Considerations - Profiles & Data
- Multiple Location Considerations - Printing
- Multiple Location Considerations - Control Layer

## **Module 9: Disaster Recovery**

- Disaster Recovery - Levels
- Disaster Recovery - Strategy
- Disaster Recovery – Process
