Data Analytics Bootcamp: Project 2 Querying Data with Transact-SQL Self-Paced Learning

Modality: On Demand

Duration: 14 Days

T-SQL is a Microsoft version of SQL Language. SQL has become the Gold Standard for Relational databases. It provides rich capabilities to interact with underlying data structure and perform various operations. This project will reveal your understanding of T-SQL that you have covered in this course with some hands on Lab and Practices.

Course Outline:
