Certified Information Systems Auditor (CISA)

About this course:

This course is based on CISA Certified Information Systems Auditor Series. In this course, you will be given the required knowledge and fluency in order for you to prepare adequately for the global CISA certification exam. Since its origin in 1978, CISA certification has gain a lot of global recognition, and is considered a criterion for IS audit, security, control, and assurance personnel to affirm their skills. This course will spike the interest of the learners and will give an in-depth coverage of

the five domains that complete the “Body of Knowledge” of the CISA exam. The course will provide the students with necessary technical skills in order to develop, regulate, and perform IT security audits.

Course Outline:

- **Module 01 - The Process of Auditing Information Systems**
- **Module 02 - Governance and Management of IT**
- **Module 03 - Information Systems Acquisition, Development and Implementation**
- **Module 04 - Information Systems Operations, Maintenance and Support**
- **Module 05 - Protection of Information Assets**
