Scrum Product Owner

Modality: On Demand

Duration: 4 Hours

About this course:

A scrum project owner is the main stakeholder of the project. The owner should have a clear vision of what they aim to achieve or build and then convey it to the development team. Having a clear vision is the key element for successful agile software.

A product owner is also responsible to maximize the value proposition of the product as a result of the development team. However, the process is variable among different organizations. This depends on the process that the IT team or the Development team follows.

A Certified Scrum Product Owner earns $99,463 annually on average.

Course Objective:

At the end of this course, students will be eligible enough to:

- Produce maximum return on investments
- Develop strategies to allow maximum flexibility and response from the already existing software
- Set effective work policies while keeping the clients at a priority and managing marketplace risks in an ever-evolving environment
