Certified Information Security Manager (CISM)

About this course:

The certification program of CISM is grown explicitly for experienced managers of information security and the individuals who have the responsibilities of information security management. CISM is all around perceived as the main qualification for data security directors. Our course of CISM Certified Information Security Manager gives the understudy the information and capability to plan for the comprehensively perceived certification exam of CISM. The certification of CISM joins the accomplishment of breezing through a far-reaching test with acknowledgment of work, educational and management experience, giving you more noteworthy validity in the commercial center. This course will drench the understudy into the subject, with inside and out the inclusion of the data covering the four spaces that make up the "Body of Knowledge" for the exam of CISM and will give the understudy the instruments to construct their specialized aptitudes to oversee, structure, administer and assess the information security of the enterprise.

The normal compensation for a Certified Information Security Manager is $125,000 every year.
