

CompTIA Cloud+ Advanced

Modality: On Demand

Duration: 4 Hours

About this course:

This is CompTIA Cloud+ Advanced course. The course touches upon the topics mentioned in CompTIA Cloud+ Intermediate and CompTIA Cloud+ Basic courses. In this course, these topics will be discussed in great depth. The students will be prepared to take the CompTIA Cloud+ CV0-002 exam. Students will learn extensively about analyzing, selecting, monitoring, and protecting cloud resources.

This course is an installation of the three-part series that are designed to completely discuss the CompTIA Cloud+ exam CV0-002 syllabus. Students that have completed the entire series will be able take this exam confidently, because they would have learned the important knowledge and experience components in order to pass the exam.

On average, a CompTIA certified earns \$90,572 per annum.

Learning objectives:

The course has the following learning objectives:

- Testing and Tools
- Security and Controls
- Recovery and Availability

Audience:

The course has been designed for the following groups:

- IT professionals, those who are working with IT vendors and enterprise customers and wish to get training in analyzing, monitoring or securing cloud resources, and those who are working with cloud-systems
- As this is a vendor-agnostic course therefore the course also covers the common technical concepts that are usable for every vendor's cloud infrastructure

Requirements:

It is highly recommended for the students to take the CompTIA Cloud+ Basic and CompTIA Cloud+ Intermediate courses prior to taking this course.

This course has advanced-level difficulty as compared to the Basic and Intermediate courses.

Suggested pre-taken courses:

- CompTIA Cloud+ Basic
- CompTIA Cloud+ Intermediate

Course Outline:

- **Chapter 01 - Testing and Tools**
- **Chapter 02 - Security and Controls**
- **Chapter 03 - Recovery and Availability**
