**Learning Style: On Demand**

**Technology: Cisco**

**Difficulty: Intermediate**

**Course Duration: 40 Hours**

## **Designing Cisco Enterprise Wireless Networks (ENWLSD) v2.0 - On Demand**

### **Course Information**

#### **About this course:**

This course provides you the knowledge you need to design Cisco wireless

networks. You will also learn design specifics from scenario design concepts through the installation phase and into post-deployment validation.

After completing this course you will be prepared to take the Designing Cisco Enterprise Wireless Networks (300-425 ENWLSD) exam, passing which will lead to the new CCNP® Enterprise and Cisco Certified Specialist – Enterprise Wireless Design certifications.

## **Course Objective:**

Taking this course will enable you to:

- Describe and implement Cisco enhanced wireless features
- Describe and implement the wireless design process
- Describe and implement specific vertical designs
- Describe and implement a Cisco-recommended structured design methodology
- Describe and implement industry standards, amendments, certifications, and Requests For Comments (RFCs)
- Describe and implement network validation processes
- Describe and implement site survey processes

## **Audience:**

- Network administrator
- Network engineer
- Sales engineer
- Consulting systems engineer
- Systems engineer
- Technical solutions architect
- Network manager
- Wireless design engineer
- Wireless engineer

## **Prerequisite:**

You should know the following before taking this course:

- General knowledge of wireless networks
- Routing and switching knowledge
- General knowledge of networks

Either of the following combinations of Cisco courses can help you meet these prerequisites:

- Implementing Cisco Wireless Network Fundamentals (WIFUND) and Interconnecting Cisco Networking Devices, Part 1 (ICND1)
- Implementing and Operating Cisco Enterprise Network Core Technologies (ENCOR) and Understanding Cisco Wireless Foundations (WLFNDU)

## Course Outline:

### Describing and Implementing a Structured Wireless Design Methodology

- Importance of Planning Wireless Design with a Structured Methodology
- Cisco Structured Design Model
- Cisco Design Guides and Cisco Validated Designs for Wireless Networks
- Role of the Project Manager When Designing Wireless Networks

### Describing and Implementing Industry Protocols and Standards

- Wireless Standards Bodies
- Institute of Electrical and Electronics Engineers (IEEE) 802.11 Standard and Amendments
- Wi-Fi Alliance (WFA) Certifications
- Relevant Internet Engineering Task Force (IETF) Wireless RFCs
- Practice Activity

### Describing and Implementing Cisco Enhanced Wireless Features

- Hardware and Software Choices for a Wireless Network Design
- Cisco Infrastructure Settings for Wireless Network Design
- Cisco Enhanced Wireless Features

### Examining Cisco Mobility and Roaming

- Mobility and Intercontroller Mobility in a Wireless Network
- Optimize Client Roaming in a Wireless Network
- Cisco Workgroup Bridge (WGB) and WGB Roaming in a Wireless Network

### Describing and Implementing the Wireless Design Process

- Overview of Wireless Design Process
- Meet with the Customer to Discuss the Wireless Network Design
- Customer Information Gathering for a Wireless Network Design
- Design the Wireless Network
- Deployment of the Wireless Network
- Validation and Final Adjustments of the Wireless Network
- Wireless Network Design Project Documents and Deliverables

### Describing and Implementing Specific Vertical Designs

- Designs for Wireless Applications
- Wireless Network Design Within the Campus
- Extend Wireless Networks to the Branch Sites

### Examining Special Considerations in Advanced Wireless Designs

- High-Density Designs in Wireless Networks
- Introducing Location and Cisco Connected Mobile Experiences (CMX)

Concepts  
Design for Location  
FastLocate and HyperLocation  
Bridges and Mesh in a Wireless Network Design  
Redundancy and High Availability in a Wireless Network

## Describing and Implementing the Site Survey Processes

Site Survey Types  
Special Arrangements Needed for Site Surveys  
Safety Aspects to be Considered During Site Surveys  
Site Survey Tools in Cisco Prime Infrastructure  
Third-Party Site Survey Software and Hardware Tools

## Describing and Implementing Wireless Network Validation Processes

Post-installation Wireless Network Validation  
Making Post-installation Changes to a Wireless Network  
Wireless Network Handoff to the Customer  
Installation Report

## Credly Badge:

### Display your Completion Badge And Get The Recognition You Deserve.

Add a completion and readiness badge to your LinkedIn profile, Facebook page, or Twitter account to validate your professional and technical expertise. With badges issued and validated by Credly, you can:

- Let anyone verify your completion and achievement by clicking on the badge
- Display your hard work and validate your expertise
- Display each badge's details about specific skills you developed.

Badges are issued by QuickStart and verified through Credly.
