**Course Duration: 40 Hours**

## Implementing Cisco SD-WAN Solutions (SDWAN300) v3.0 - On Demand

### About this course:

The Implementing Cisco SD-WAN Solutions (SDWAN300) v3.0 course gives you deep-dive training about how to design, deploy, configure, and manage your Cisco Software-Defined WAN (SD-WAN) solution in a large-scale live network, including

how to migrate from legacy WAN to SD-WAN.

You will learn best practices for configuring routing protocols in the data center and the branch, as well as how to implement advanced control, data, and application-aware policies. The course also covers SD-WAN deployment and migration options, placement of controllers, how to deploy and replace edge devices, and how to configure direct internet access (DIA) breakout.

## **Course Objective:**

After taking this course, you should be able to:

- Describe the Cisco SD-WAN overlay network and how modes of operation differ in legacy WAN versus SD-WAN
- Describe options for SD-WAN cloud and on-premises deployments, as well as how to deploy virtual vEdge and physical cEdge devices with Zero Touch Provisioning (ZTP) and device templates
- Describe best practices in WAN routing protocols, as well as how to configure and implement transport side connectivity, service side routing, interoperability, and redundancy and high availability
- Describe dynamic routing protocols and best practices in an SD-WAN environment, transport side connectivity, service side connectivity, and how redundancy and high availability are achieved in SD-WAN environments
- Explain how to migrate from legacy WAN to Cisco SD-WAN, including typical scenarios for data center and branch
- Explain how to perform SD-WAN day 2 operations, such as monitoring, reporting, logging, and upgrading

## **Audience:**

- System installers, integrators, and administrators
- Network administrators
- Solution designers

## **Prerequisite:**

To fully benefit from this course, you should have the following knowledge and skills:

- Knowledge of SDN concepts as applied to large-scale live network

deployments

- Strong understanding of enterprise WAN design
- Strong understanding of routing protocol operation, including both interior and exterior routing protocol operation
- Familiarity with Transport Layer Security (TLS) and IP Security (IPsec)

## **Course Outline:**

### **Cisco SD-WAN Overlay Network**

Examining Cisco SD-WAN Architecture

### **Cisco SD-WAN Deployment**

Examining Cisco SD-WAN Deployment Options  
Deploying Edge Devices  
Deploying Edge Devices with Zero-Touch Provisioning  
Using Device Configuration Templates  
Redundancy, High Availability, and Scalability

### **Cisco SD-WAN Routing Options**

Using Dynamic Routing  
Providing Site Redundancy and High Availability  
Configuring Transport-Side Connectivity

### **Cisco SD-WAN Policy Configuration**

Reviewing Cisco SD-WAN Policy  
Defining Advanced Control Policies  
Defining Advanced Data Policies  
Implementing Application-Aware Routing  
Implementing Internet Breakouts and Network Address Translation (NAT)

### **Cisco SD-WAN Migration and Interoperability**

Examining Cisco SD-WAN Hybrid Scenarios  
Performing a Migration

### **Cisco SD-WAN Management and Operations**

Performing Day-2 Operations  
Performing Upgrades

## **Credly Badge:**

## **Display your Completion Badge And Get The Recognition You Deserve.**

Add a completion and readiness badge to your LinkedIn profile, Facebook page, or Twitter account to validate your professional and technical expertise. With badges issued and validated by Credly, you can:

- Let anyone verify your completion and achievement by clicking on the badge
- Display your hard work and validate your expertise
- Display each badge's details about specific skills you developed.

Badges are issued by QuickStart and verified through Credly.
