

Implementing Automation for Cisco Collaboration Solutions (CLAUI)

v1.0 - On Demand

Modality: On Demand

Duration: 40 Hours

CLC: 3 Units

Course Information

About this course:

This course will teach you skills to implement Cisco Collaboration automated, programmable solutions for voice, video, collaboration, and conferencing on-premises or in the cloud.

Through a combination of lessons and thorough hands-on labs, you will be using key platforms including Cisco Unified Communications Manager, Cisco IP Phone Services, Cisco Unity® Connection, Cisco Finesse®, Cisco Collaboration Endpoints, Cisco Webex Teams™, and Cisco Webex® Meetings to tackle communication challenges by combining these tools and processes. You will also learn how to use application programming interfaces (APIs), interfaces such as Representational State Transfer (REST) and Simple Object Access Protocol (SOAP), parsing data in XML and JavaScript Object Notation (JSON) formats, and leverage frameworks such as Python.

Upon completing this course you will get fully prepared to take the Automating and Programming Cisco Collaboration Solutions (300-835 CLAUTO) certification exam.

Course Objective:

After taking this course, you should be able to:

- Examine Experience API (xAPI) and automation capabilities and concepts for Cisco Collaboration endpoints
- Examine API and automation capabilities and concepts for Cisco Webex Teams
- Examine API and automation capabilities and concepts for Cisco Webex Meetings
- Examine API and automation capabilities and concepts for Cisco Unified Communication Manager
- Examine API and automation capabilities and concepts for Cisco Unity Connection
- Examine API and automation capabilities and concepts for Cisco Finesse

Audience:

This course is designed for network and software engineers interested in Cisco Collaboration and Webex automation and who hold job roles such as:

- Collaboration software developer
- Collaboration sales engineer

- Wireless engineer
- Wireless design engineer
- Network manager
- Software developer
- Software architect
- Network engineer
- Systems engineer
- Consulting systems engineer
- Technical solutions architect
- Network administrator
- Collaboration solutions architect
- Collaboration software developer
- Technical solutions architect
- Collaboration solutions architect

Prerequisite:

You should have the following knowledge and skills before taking this course:

- Intermediate knowledge in managing and configuring three or more of the following Cisco Collaboration offerings:
 - Cisco Unified Communications Manager
 - Cisco IP Phones
 - Cisco Finesse
 - Cisco Webex Devices (Collaboration and Video Endpoints)
 - Cisco Webex Teams
- Basic knowledge of Simple Object Access Protocol (SOAP) and REST APIs
- Basic programming and scripting skills in Python

The following Cisco courses can help you gain the knowledge you need to prepare for this course:

- Understanding Cisco Collaboration Foundations (CLFNDU)
- Programming Use Cases for Cisco Digital Network Architecture (DNAPUC)
- Introducing Cisco Network Programmability (NPICNP)
- Implementing and Administering Cisco Solutions (CCNA)
- Introducing Automation for Cisco Solutions (CSAU)
- Implementing and Operating Cisco Collaboration Core Technologies (CLCOR)

Course Outline:

Automating Cisco Unified Communications Manager

Cisco Unified Communications Manager: AXL API Overview
Built-In AXL API Calls
SQL API Calls
Computer Telephony Integration
CDRs and Performance APIs
Phone Services APIs

Automating Cisco Unity Connection

Cisco Unity Connection

Automating Cisco Finesse

Cisco Finesse APIs

Cisco Finesse Gadgets

Examining Cisco Collaboration Endpoint Automation

Cisco xAPI Overview

In-Room Control Editor Introduction

Macro Introduction

Examining Cisco Cloud Collaboration Automation

Cisco Webex Administration API Overview

Cisco Webex Teams Bots Overview

Widgets Overview

Cisco Webex Teams SDK

Examining Cisco Conferencing Automation

Cisco Webex Meetings API

Cisco Meeting Server API
