

Implementing Cisco Advanced Call Control and Mobility Services (CLACCM) v1.0 - On Demand

Modality: Self-Paced Learning

Duration: 40 Hours

SATV Value:

CLC: 10 Units

NATU:

SUBSCRIPTION: No

Course Information

About this course:

This course will help you learn how to use Cisco Unified Communications Manager (Cisco Unified CM) features to consolidate your communications infrastructure into a scalable, portable, and secure collaboration solution. covers advanced call control and mobility services.

A series of concept building lessons and hands-on training will help you learn about a wealth of other features such as Cisco Unified Border Element Call deployments, signaling and media protocols, Globalized Call Routing, Global Dial Plan Replication, Device Mobility, Session Initiation Protocol Uniform Resource Identifier (SIP URI) call routing, Call Admission Control, Cisco Unified Mobility, Cisco Extension Mobility Cisco Unified CM Express and Survivable Remote Site Telephony (SRST) gateway technologies, call coverage, and time-of-day routing.

Upon completing this course you will be fully prepared to take the Implementing Cisco Advanced Call Control and Mobility Services (300-815 CLACCM) exam.

Course Objective:

After taking this course, you should be able to:

- Implement Media Gateway Control Protocol (MGCP) fallback and Survivable Remote Site Telephony (SRST) in Cisco Unified CM and in Cisco IOS XE gateways
- Implement Call Admission Control and automated alternate routing (AAR) in Cisco Unified CM
- Troubleshoot multisite Cisco Unified CM deployments
- Implement Intercluster Lookup Service (ILS) between Cisco Unified CM clusters and enable General Data Protection Regulation (GDPR)
- Configure and troubleshoot Cisco Unified Border Element
- Analyze and troubleshoot SIP, H.323, and media protocols
- Implement call coverage in Cisco Unified CM
- Configure and troubleshoot Cisco Unified CM Device Mobility, Extension Mobility, and Unified Mobility

- Implement Cisco Unified CM Express for SIP phones
- Implement globalized call routing between Cisco Unified CM clusters

Audience:

This course is designed for Collaboration engineers and administration professionals in job roles such as:

- Network designer
- Network engineer
- Network manager
- Network administrator
- Network architect

Prerequisite:

You should have the following knowledge and skills before taking this course:

- Describe the call setup/teardown process for a SIP device
- Manage user accounts and call routing in a Cisco Unified CM
- Describe and configure dial plan elements within a single site Cisco Unified CM deployment
- Implement basic globalized call routing within a Cisco Unified CM cluster
- Implement public switched telephone network (PSTN) access
- Basic understanding of networking, voice and video technologies
- Describe the different codecs and how they transform analogue voice into digital streams
- Knowledge of Cisco IOS XE command line
- Configure and modify requirements within the Cisco Unified CM
- Deploy and troubleshoot IP phones via manual configuration within Cisco Unified CM
- Implement, manage and troubleshoot media resources in a Cisco Unified CM

The following Cisco courses can help you gain the knowledge you need to prepare for this course:

- Implementing and Operating Cisco Collaboration Core Technologies (CLCOR) v1.0
- Understanding Cisco Collaboration Foundations (CLFNDU) v1.0

Course Outline:

- **Analyzing and Troubleshooting Signaling and Media Protocols**
- **Implementing Cisco Unified Communications Manager Supplemental Services**
- **Implementing Call Coverage in Cisco Unified Communications Manager**
- **Configuring and Troubleshooting Cisco Unified Communications Manager Device Mobility**
- **Configuring and Troubleshooting Cisco Unified Communications Manager Extension Mobility**
- **Configuring and Troubleshooting Cisco Unified CM Unified Mobility**
- **Implementing Cisco Unified Communications Manager Express**
- **Implementing Globalized Call Routing**

- **Implementing Remote Site Survivability**
- **Implementing Call Admission Control in Cisco Unified Communications Manager**
- **Implementing URI Calling in Cisco Unified Communications Manager**
- **Troubleshooting Multisite Cisco Unified Communications Manager Deployments**
- **Examining Global Dial Plan Replication**
- **Configuring and Troubleshooting Cisco Unified Border Element**
