Course Information

About this course:

This course will help you learn how to deploy the Cisco Identity Services Engine (ISE). You will then be able to support the Software-Defined Access (SD-Access) solution within your enterprise networks.

You will gain an understanding of how to provide security policies across organization when Cisco ISE is utilized by the SD-Access solution. You will learn Cisco ISE fundamentals and get hands-on practice configuring Cisco ISE policies, wireless guest access, VPN access, AAA (authentication, authorization, and accounting) client configuration, integration and more.

Course Objective:

You will develop the following skills after completing this course:

- Describe Cisco ISE policies and authentication and authorization process
- Describe Cisco ISE integration with Cisco DNA Center and policy enforcement using security groups
- Provide configuration examples for wired, wireless, and VPN network access
- Understand how inline tagging and SGT Exchange Protocol (SXP) works
- Understand different AAA protocols
- Understand how Cisco ISE fits into Cisco Digital Network Architecture (Cisco DNA) Center architecture
- Provide configuration examples of Cisco ISE and TrustSec solutions

Audience:

- System engineers
- Network engineers
- Technical architects
- Technical support engineers
- Cisco integrators and partners

Prerequisite:

You should have the following knowledge and skills to fully benefit from this course:
