

AppDynamics (APPDYN)

Modality: Virtual Classroom

Duration: 2 Days

SATV Value:

CLC: 24 Units

NATU:

SUBSCRIPTION: No

About this course:

This course covers a comprehensive topic list covering the keys aspects of AppDynamics deployment and use. You will discover faster, more efficient monitoring with an enterprise Application Performance Management (APM) solution that learns your apps. By understanding end-user monitoring, you can create superior experiences by monitoring where customers are connecting with your business the most. The topic of Infrastructure visibility allows you to monitor the servers and databases critical to supporting application performance. By the end of the course, you will be able to successfully deploy and use AppDynamics.

Course Objective:

- AppDynamics concepts and use
- Monitor Application
- Analyze End-User Monitoring
- Use Server Monitoring
- Understand Application Analytics

Audience:

- Individuals interested in application performance

Prerequisite:

- Familiarity with applications in the enterprise.

Course Outline:

Module 1. AppDynamics Essentials

Getting Started
AppDynamics Concepts
Using the Controller UI
Metrics and Graphs
Monitor Infrastructure

Module 2. Application Monitoring

- Model the Application Environment
- Business Applications
- Business Transactions
- APM for Python, Java and .NET Applications
- APM for PHP and Node.js Applications
- APM for Apache Web Servers

Module 3. End-User Monitoring

- Browser Real User Monitoring
- Browser Synthetic Monitoring
- Mobile Real User Monitoring

Module 4. Server Monitoring

- Enable Server Monitoring
- Monitor Your Servers Using Server Monitoring
- Configure Server Monitoring
- Configure Machine Health Rules, Policies, and Alerts

Module 5. Application Analytics

- Deployment Options and Scenarios
- Installing Agent-Side Components
- Remote Analytics Agent Sizing
- Configuring Application Analytics

Labs

- Lab 1: Introduction AppDynamics GUI
- Lab 2: Monitoring and Modeling Application
- Lab 3: End-User Monitoring
- Lab 4: Server Monitoring
- Lab 5: Application Analytics
