Cloud Volumes ONTAP-AWS

Modality: On Demand

Duration: 1 Hour

About this Course:

Cloud Volumes ONTAP is a software-only version of Data ONTAP, which is the data management operating system from NetApp that is used on physical NetApp storage appliances. With Cloud Volumes ONTAP, the operating system has been customized to run as an Amazon Elastic Compute Cloud (Amazon EC2) instance. With Cloud Volumes ONTAP on AWS, you can spin up a new enterprise class data management system in minutes on the cloud.

Course Outline:

- CVO and AWS Basic Concepts
- AWS and Cloud Manager
- CVO and Cloud Manager Deployment
- CVO-AWS
- CVO-Data Protection and Features
