Difficulty: Intermediate

Course Duration: 1 Hour

Machine Learning Options in the Cloud

About this Course:

Artificial intelligence and machine learning are steadily making their way into enterprise applications in areas such as customer support, fraud detection, and business intelligence. There is every reason to believe that much of it will happen in the cloud.

In this course the following will be covered:

- What Machine learning is about and why It's a better alternative to leveraging static program instructions (instead making data-driven predictions or decisions that will improve over time without human intervention and additional programming)
- Machine Learning options around AWS, Azure and GCP that would provide significant benefits around efficiency.
- TensorFlow , a Python-friendly open-source library for numerical computation that performs machine learning faster

Audience:

- Data Science Professionals
- AI Engineers
- Cloud Computing Professionals

Course Outline:

- What is Machine Learning
- ML and AI Platform
- Whiteboard
- Service Option in the Cloud
- TensorFlow

Credly Badge:

Display your Completion Badge And Get The Recognition You Deserve.

Add a completion and readiness badge to your Linkedin profile, Facebook page, or Twitter account to validate your professional and technical expertise. With badges issued and validated by Credly, you can:

- Let anyone verify your completion and achievement by clicking on the badge
- Display your hard work and validate your expertise
- Display each badge's details about specific skills you developed.

Badges are issued by QuickStart and verified through Credly.
