Illustrator CS5 Advanced

Modality: On Demand

Duration: 2 Hours

About this Course:

Illustrator is the go-to drawing/sketch/design software for creating web sites, business cards, flyers, brochures, logos, and other graphic artwork. Illustrator is a "vector" based program which allows you to create smooth and professional graphics that scale smoothly.

Course Objectives:

- You'll learn how to use Adobe Illustrator and all of its best features. Along the way, you'll also learn some design theory and how to quickly match colors, create professional looking effects, and interfaces.

Audience:

- Designers, potential designers, and people who want to create professional level web site designs, print designs, and illustrations.

Course Outline:
